Profile Summary

Data Analyst with strong skills in SQL, Python, and Power BI, focused on solving real-world business problems through data-driven insights. Experienced in building dashboards, performing data analysis, and developing machine learning-based solutions. Passionate about improving business performance, operational efficiency, and decision-making through analytics.

Skills

- Programming & Analytics:
  Python (Pandas, EDA), SQL
- Data Visualization:
  Power BI, Excel Dashboards
- Tools & Technologies:
  Excel, MySQL, RDBMS
- Core Concepts:
  Data Cleaning, Exploratory Data Analysis (EDA), KPI Reporting, Business Insights

Experience

1. Data Analytics Intern
   Luminar Technolab, Kochi
   Feb 2026 – Present

- Analyzing real-world datasets to generate business insights
- Building dashboards and reports using Power BI
- Using SQL and Python for data processing and analysis

2. AI & Sustainability Intern
   Edunet Foundation
   Feb 2025 – Mar 2025

- Developed a machine learning-based waste segregation system
- Applied AI techniques to solve sustainability challenges
- Performed data classification and model implementation

Projects

1. Sales Performance Dashboard (Power BI, SQL)
- Transformed raw data into actionable business insights
- Built KPI dashboard using Power BI and SQL for sales analysis
2. HR Analytics Project (Python, Excel)
- Performed EDA and data cleaning on employee dataset
- Generated insights for workforce and performance analysis
3. AI-Based Pothole Detection (YOLOv5, Streamlit)
- Developed pothole detection model using YOLOv5
- Built Streamlit UI for real-time image-based detection

Education

Bachelor of Computer Applications (BCA) – Data Science
Acharya Institute of Graduate Studies, Bangalore City University
2022 – 2025

Certifications

- IBM Data Science (Software Foundations, RDBMS, Data Visualization, Big Data – Spark & Scala)
- Advanced Python – Reconnaissance
